

## **PROJECT RESULTS**

### **Stage I - 27/01/2009**

- continuous indexable processing head studies and analysis,

### **Stage II - 06/30/2010**

- New product completed,
- Patent proposal.

Title of the patent application - **Double rotary head continuous indexing system axes for metals processing.**

- Technical feasibility study for continuous indexable processing head CU 37,
- Completed projects:
  - Processing head CU 37 assembly project,
  - Processing head CU 37 part design execution,
  - Mechanical interface design execution of the processing head with CNC machine-tool,
